EXAMINER'S COMMENTS

Comments

Respecting the provisional obviousness type double patenting, the Examiner does not agree with Applicant as to why such rejection has been overcome. At page 8 of their amendment, Applicants have urged that this rejection is overcome because of the same reasons that the rejection under 35 U.S.C. § 103 has been overcome. While the claims of co-pending application No. 10/894,364 would not form a basis, either alone or with the secondary references cited in the previous Office action, for rejecting the present claims, it must be remembered that an obviousness-type double patenting rejection of the type raised by the Examiner may be made by a one-way determination (see MPEP § 804(II)(B)(1)(a)). If one were to use the present claims as the basis of the rejection, it is believed that it could be concluded that the claims of the co-pending application would have been obvious as such claims are encompassed by the present claims.

The present provisional obviousness-type double patenting rejection, however, is properly withdrawn by the Examiner because it is the sole remaining issue in the case (see MPEP § 804, near the end).

Accordingly, claims 4-6 and 11-24, all of the claims in the case, are allowed.
